THE PROBLEM

Hard to focus

Want to focus on a specific time without any distraction?
Hardly handling doomscrolling?
....

My Solution - Meet Pomo Pomo

Pomo Pomo

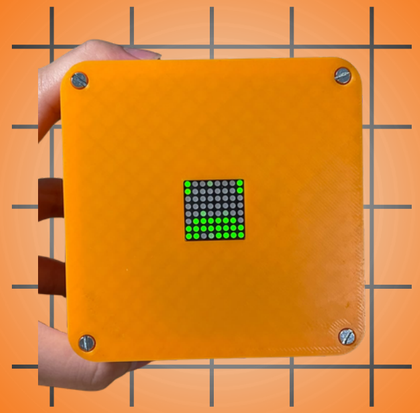

Set up timer easily

Interactable

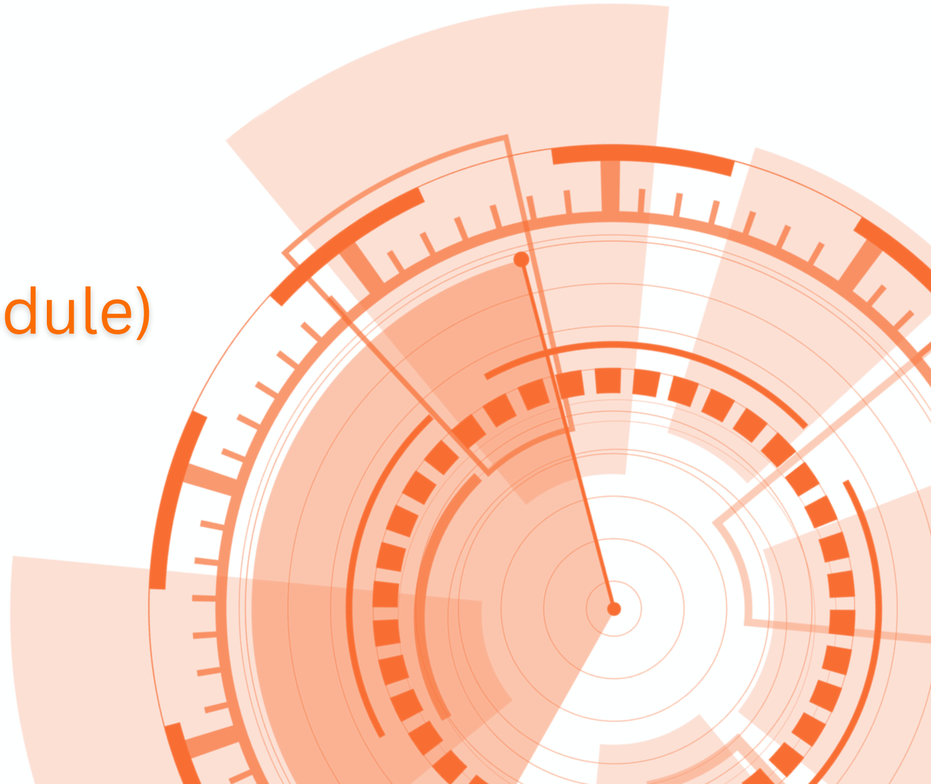

Cool Matrix Display

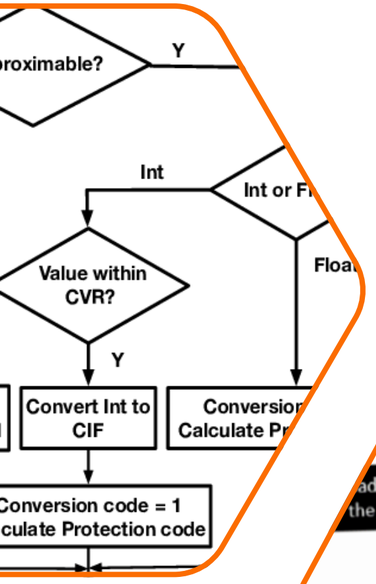

Main components

- Arduino MKR 1010 (Main brain)
- Raspberry Pi Pico (LED Matrix Display brain)
- Touch sensor
- 16x2 LCD Display
- Accelerometer sensor
- DHT11 Temperature and Humidity sensor
- 8x8 LED Matrix Display (16 pins, without I2C module)
- Buzzer (3V)
